

# **Keep Mappleton's Drains Clear**

## **The main causes of Blockages: Wet wipes.**

A staggering 40% of blockages are caused by wet wipes, including so-called flushable wipes that don't break down in the sewer.

Other items that should never go down the loo or the sink:

Kitchen Paper.

Nappies.

Sanitary Products.

Cooking Oil.

Cotton Buds.

Cat Litter.

Paint.

Left Over Food.

Sticking Plasters.

In January 2020 a major blockage to the sewer was found in Cliff Lane, Mappleton, the cause was a build up of wet wipes.

This caused the sewage system to back up, and as a result, raw sewage was discharging onto the main road, at the entrance to Mappleton.

**Please do be mindful of what you flush down the  
Toilet and Sink.**
